## TECHNOLOGIES

---

Here are some technologies that I have had a strong history with and wish to work with in the future. Listed in no particular order.

**Languages**            Python, C, C++, C#, JavaScript

**Libraries**            Flask, WPF, SDL, jQuery, mongoengine, Requests

---

## WORK HISTORY

---

**JetHead Development Inc: Software Developer Intern**                      Summers of 2012 and 2013

During my two internships at JetHead I was responsible for designing and implementing a new closed captioning implementation for their set top boxes, as well as helping with bug fixes and various new features.

**UC Riverside: Supplemental Instruction Leader**                                      March 2011 to Present

As an SI Leader I have had the opportunity to convince freshman college students that Computer Science is an amazing discipline while helping them learn their craft. I am now a Mentor and therefore also responsible for training my fellow SI Leaders.

**Galah Group LLC: Founder**    Jan 2011 to Present

We develop and maintain a system capable of automatically grading and providing near-instant feedback for computer programming assignments. UC Riverside is currently using it in four courses. See [johnsullivan.name/projects.htm#galah](http://johnsullivan.name/projects.htm#galah) for more information.

---

## EDUCATION

---

**University of California, Riverside**

I am currently attending my 4<sup>th</sup>-year as a Computer Scientist. 3.155 cumulative GPA. Expecting graduation in June of 2015.

**Self-Taught**

I began programming in 3<sup>rd</sup> grade and I have been actively exploring software engineering ever since. See [johnsullivan.name/about.htm#backstory](http://johnsullivan.name/about.htm#backstory) for the full story.
